VI- READING COMPREHENSION (14 MARKS)

Read the following passage, then answer the questions below:

Building modern cities needs a lot of planning and a lot of time. Many countries design and build new cities to help in solving traffic and housing problems. Although Brazil is one of the richest countries in the world, much of it has not been developed yet. It was mainly for this reason that the Brazilian government decided to have a new city built 600 miles north – west Rio de Janeiro. Designed by the great architect Lucio Costa, the new city, Brasilia, replaced Rio de Janeiro as the capital of Brazil in 1960.

Brasilia has been carefully planned for modern living. Its wide roads, which can take fourteen lanes of traffic, have been kept away from living areas. Children don't have to cross busy streets to go to school. Housewives can visit shopping centres on foot because in these specially designed living areas, cars are unnecessary.

At first, the government had great difficulty in persuading people to leave Rio and to settle in Brasilia. Since 1960, however, the population has been growing all the time. Brasilia has quickly established itself as the capital of the country. The idea to have the capital moved so far inland will have a great effect on the future of Brazil.
