| Pre-writing techniques (brain storming – mind mapping – outlining) | 2 | |
| Spelling and grammar | 2 | |
| Handwriting , spacing and punctuation | 1 | |

Write your topic here (13 Marks)

VI-READING COMPREHENSION (20Marks)

Read the following passage, then answer the questions below:

Plants cannot live without water, light and air. The problem of water is most difficult in the deserts. Desert plants adapt in the desert weather. Some desert plants send their roots deep into the ground, to **reach** the water stored below. One of these plants is the cactus. The cactus usually has thin roots. So when it rains, the cactus absorbs as much water as possible. It stores this water in its stems.

All green plants must have light to grow. This is the job of their leaves in a process called "photosynthesis "or making food. Most trees and grasses grow best in full sunlight. But there are some plants that do not need much light. Full sunlight would kill them. For example some water plants grow 450 feet below the surface of the water. At that depth the light is weaker than that of the full moon.

Plants also need air to survive. The plants need **it** for making their food. During the day and night, plants breathe in carbon dioxide for survival and reintroduce oxygen. They absorb carbon dioxide through the leaves .This way, the earth never runs out of oxygen.

A) Choose the correct answer from a, b, c and d (4x 2½= 10 Marks)

23) The best title for the passage could be

a. **Plants Survival**

c. Trees and Leaves

b. The sunlight

d. The dry deserts

24) The underlined word **reach** in the 1st **paragraph** means

a. look

c. ride

b. run

d. **arrive**

25) The main idea of the 2nd **paragraph** is the

a. importance of water

c. job of the roots

b. **plants food**

d. importance of air

26) The underlined word **it** in the 3rd **paragraph** refers to.....

a. food

c. night

b. day

d. **air**

B) Answer the following questions: (4 X 2½= 10 Marks)

27) Why do plants send their roots deep into the ground?

To reach the water stored below.

28) Where does cactus store water?

In its stems

29) What is the job of the leaves?

The job of the leaves is "photosynthesis "or making food

30) How do desert plants adapt in the desert?

Plants in the desert have tougher leaves than other plants to adapt with the different weathers in the desert.
